

HuntJack Whitepaper

A Next-Level On-Chain Casino on Solana

About HuntJack

HuntJack is a next-generation on-chain casino built on Solana, delivering instant gameplay, transparent mechanics, and provably fair outcomes. Designed for speed and fairness, HuntJack leverages the efficiency of Solana to provide a seamless gaming experience powered by the \$HJ SPL token.

The \$HJ Token

The native token of the HuntJack ecosystem, \$HJ serves as the exclusive in-game currency used for wagering, payouts, fees, and burning mechanisms. With a fixed total supply of 1,000,000,000 \$HJ tokens, the economy is designed for sustainability, fairness, and long-term growth.

Provably Fair System

All HuntJack games utilize on-chain verifiable randomness through commit–reveal schemes. This ensures that every outcome—whether Spinwheel, Dice, or Coinflip—is publicly auditable on Solana. No hidden logic, no manipulation, complete transparency.

Ecosystem Games

Spinwheel – Synchronized 14-second rounds for all players.

Dice – Adjustable roll-under odds with transparent payouts.

Coinflip – PvP betting with commit–reveal randomness and no house bias.

Each game is modular, upgradeable, and created for long-term scalability.

Token Utility

Used as the only wagering currency.

Portion of fees are burned to reduce supply over time.

Rewards future ecosystem expansion.

Powers governance features (if activated in later phases).

Roadmap

Phase 1 – Token Launch, Core Games, Branding

Phase 2 – Advanced UX, Leaderboards, Social Rewards

Phase 3 – Mobile Experience, New Game Modules

Phase 4 – Cross-platform expansion and partnerships
